

FIFO: FIFO in frame

LRU: Replace "oldest" in frame

Optimal: Look into the "future"; replace with farthest # in "future" non-existent

Clock: "Advanced" FIFO?

FIFO Algorithm

Ref. String: 7, 0, 1, 2, 0, 3, 0, 4, 2, 3, 0, 3, 1, 2, 0

	F ₁	F ₂	F ₃	F ₁	F ₂	F ₂	F ₃	F ₁	F ₂	F ₃	F ₁	F ₂	F ₂	F ₃	F ₁
F ₁	7	7	7	2	2	2	2	4	4	4	0	0	0	0	0
F ₂		0	0	0	0	3	3	3	2	2	2	2	1	1	1
F ₃			1	1	1	1	0	0	0	3	3	3	3	2	2

Done!

Note: Can't have two same #'s in same frame!

- We're at F₁, replace 7 with 2
- 0 stays, so we "ignore" it and stay in F₂

3 already in frame, ignore, stay F₂

LRU Algorithm

Ref. String: 7, 0, 1, 2, 0, 3, 0, 4, 2, 3, 0, 3, 1, 2, 0

→ Use marks to keep track of # "date"

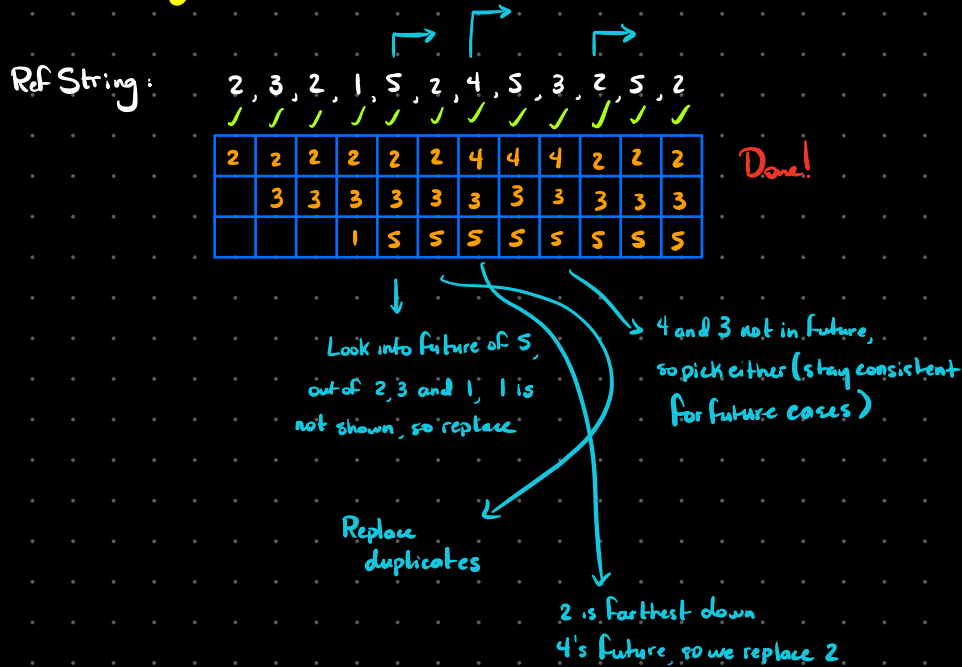

7	7	7	2	2	2	2	4	4	4	0	0	0	2	2
	0	0	0	0	0	0	0	0	3	3	3	3	3	0
		1	1	1	3	3	3	2	2	2	2	1	1	1

Done!

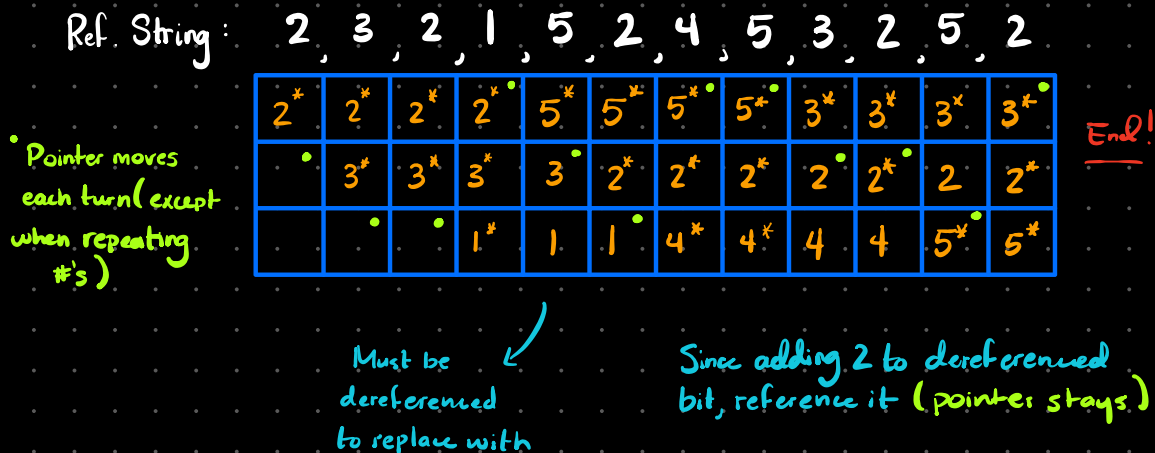

) (

Oldest Number: 7
Replace "Updates" 0

Optimal Algorithm

Clock Algorithm

- Can only remove/replace number with new #

When * regains its bit, doesn't move
